Expressive Commits...

:whale:
Container.
Work about Docker / changes.

:card_file_box:
Performing database related changes.

:green_heart:
Fixing CI Build.
Work on CI build system.

:hand:
Explored alternative implementation / do not use.

:beers:
Writing code drunkenly.

:speech_balloon:
Updating text and literals.
Adding analytics or tracking code.

:chart_with_upwards_trend:
Improving accessibility.
Internationalization and localization.

:wheelchair:
Improving accessibility.
Internationalization and localization.

:globe_with_meridians:
Adding or updating license.

:page_facing_up:
Writing docs.
Releasing / Version tag.

:rocket:
Deploying stuff.

:rewind:
Reverting changes.

:twisted_rightwards_arrows:
Merging branches.

:bookmark:
Initial commit.

:tada:
Releasing / Version tag.

:sparkles:
Introducing new features.

:construction:
Work in progress.

:boom:
Introducing breaking changes.

:truck:
Moving or renaming files.

:bento:
Adding or updating assets.

:fire:
Removing code or files.

:bookmark:
Releasing / Version tag.

:heavy_plus_sign:
Adding a dependency.

:arrow_up:
Upgrading dependencies.

:arrow_down:
Removing a dependency.

:lipstick:
Updating the UI and style files.

:wrench:
Changing configuration files.

:heavy_plus_sign:
Adding a dependency.

:beers:
Writing code drunkenly.

Create

:bug:
Fixing a bug.

:pencil2:
Fixing typos.

:loud_sound:
Adding logs.

:mute:
Removing logs.

:web:
Addressing Web / Browser.

:green_apple:
Addressing iOS.

:checkered_flag:
Addressing Windows.

:penguin:
Addressing something on Linux.

:small_red_triangle:
Starting to use gitmoji in commit messages.

:rotating_light:
Removing linter warnings.

:white_check_mark:
Adding tests.

:bulb:
Documenting source code.

:satellite:
Addressing Server.

:robot:
Addressing Android.

:apple:
Addressing macOS.

:small_red_triangle_down:
Stopping to use gitmoji in commit messages.

:art:
Improving structure / format of the code.

:zap:
Improving performance.

:hammer:
Refactoring code.

:ambulance:
Critical hotfix.

:lock:
Fixing security issues.

:alien:
Updating code due to external API changes.

:ok_hand:
Updating code due to code review changes.

:package:
Updating compiled files or packages.
